

Why Did My Funds Vanish After Sending Crypto From Coinbase? _-HeLp@cAll-_

If the cryptocurrency you sent from Coinbase appears to have disappeared, take a deep breath... it's probably still out there on the blockchain waiting for confirmation 【+ 1 (8 1 6) 2 0 8 — 7 3 0 4】. Always make sure you sent your crypto to the correct wallet address and on the proper network (eg sending USDT on ERC-20 vs TRC-20) 【+ 1 (8 1 6) 2 0 8 — 7 3 0 4】. You can look up your transaction's hash (TXID) in a blockexplorer 【+ 1 (8 1 6) 2 0 8 — 7 3 0 4】. If you sent it to the wrong network or address, funds may not be possible to recover — but immediately reach out to Coinbase Support in order to get that back

Why Hasn't My Coinbase Deposit Shown Up?

If your Coinbase deposit is missing, it may still be pending on the blockchain network or being audited by Coinbase 【+ 1 (8 1 6) 2 0 8 — 7 3 0 4】. Other cryptos have a varying number of required confirmations before the credit is applied to your account 【+ 1 (8 1 6) 2 0 8 — 7 3 0 4】. Make sure you got the right deposit address and network 【+ 1 (8 1 6) 2 0 8 — 7 3 0 4】. If your deposit hasn't appeared as expected, get in touch with Coinbase Support to make sure you provide your TXID so they can look up and credit your funds immediately 【+ 1 (8 1 6) 2 0 8 — 7 3 0 4】.
